

## PRESENTATIONS & ACTIVITIES FOR SCHOOLS

We have a varied program of engaging presentations, events and activities for all levels of schooling which can link with community groups, organisations and businesses.

### PRESENTATION FOR EARLY LEARNING

**Duration:** 60 minutes can be adjusted for special needs or schedules.

**Equipment Required:** Either projector/screen/PA **OR** IWB **OR** Large TV Screen with HDMI input (and microphone if more than 50 students).

**Our** highly engaging and interactive session educates and informs students about the plastic pollution issue, its impact on our environment and human health. It emphasises the importance of reducing our use of disposable plastic as well as litter control. Our PowerPoint presentation employs the three learning styles; Audio, Visual & Kinesthetic. We encourage verbal repetition and include a “song, dance and action” to Jack Johnson’s popular children’s song, Reduce, Re-use Recycle. Our presentation will help your service meet Quality Area 3.3 of the National Quality Standard: “embedding sustainable practices into your everyday program and operations”. It will help children to meet the Early Learning Years outcome 2, “allowing children to become socially responsible and show respect for the environment.”

**AWARENESS  
EDUCATION  
ACTION!**

**Plastic Pollution Solutions has carried out over 500 events in schools and communities in NSW, ACT, Qld, Victoria and abroad for over 5 years.**

"Anthony's presentation for schools is ultra-informative and full of great insights into human behaviour and our effect on the ocean environment. His quest to inform students of the problem with plastic is well researched and supported by excellent photographs and stories about the environment. His interaction with students and great presentation skill really makes learning fun for all."

**LeAnn Hanson, (BTeach, M Education)**

"Anthony's presentation for the 2-5 year old Preschool group was amazing. He delivered a visual and hands on presentation, very much on the children's level of learning and had the children's interest for the entire presentation!!!!"

**Margy Reed - Ulladulla Childrens Centre**

"The content of your presentation was very informative and entertaining! It was great to see how you kept such a large group of three, four and five year olds so engaged throughout. I was most impressed when, the following day, children shared information they had learnt from the presentation while playing with a collection of sea creatures in our room. This demonstrated that children were transferring their knowledge from one situation to another. I am confident that this presentation will have a positive impact on our preschool community."

**Alison Bowe - Bomaderry Community Preschool**
